Results-driven software professional with **8 years** of experience in requirement analysis, solution delivery, and software development. Adept at designing scalable solutions and optimizing system performance to meet business needs.

Consultant Specialist at HSBC — OCT 2021 to Present

VAULT: Vault is a data aggregation project to stop all point-to-point transfers of data and connect all systems to a single source of data to avoid data duplication. Vault is also used to aggregate trade and risk data across trading desks.

Technology Used - Spring Boot, Java, Scala, React JS, Mongo, GCP, Solace and Redis

Analyst Software Developer at TIAA — DEC 2020 to OCT 2021

MVTC: Provides a service to investment providers to maintain all the details of their clients, along with the plan details, and loan information on the MVTC portal.

Technology Used: Spring Boot, Java, Angular 8, Mongo, GitLab.

Senior Developer at Girnar Software — MAY 2017 to DEC 2020

LMS: LMS is a Lead management system of CarDekho. LMS automates the entire lead processing function, from lead capture, analysis and assignment, through to "closed loop" contact management and detailed status/trend reports.
It helps to manage leads and follow-ups in a hassle-free and a very efficient way.

Technology Used: Spring Boot, Nodejs, Angular 4, Mongo, Mysql, Redis, Elasticsearch, Grafana, Kibana, Jenkins
